During its discussion and deliberation on this matter, the Agency made the following findings:

33 Sheep Hill Drive
INLAND WETLAND APPLICATION IWW #1207
COMPLIANCE WITH SECTION 10.2 and 10.4
STANDARDS AND CRITERIA FOR DECISION

The request to conduct certain regulated activities at **33 Sheep Hill Drive** in West Hartford, Connecticut pursuant to an Inland Wetland and Watercourse application **IWW #1207** should be approved as the Standards and Criteria for Decision as set forth in the Inland Wetlands and Watercourses Regulations for the Town of West Hartford in Section 10.2 have been favorably met. During its discussions and deliberations on this matter, the agency made the following findings:

- [1.] The environmental impact of the proposed regulated activity on wetlands or watercourses will not be so significant as to warrant the denial of this application.
- [2.] The applicant's purpose for the proposed regulated activity is a valid and useful one which alternatives would cause less or no environmental impact to wetlands or watercourses;
- [3.] The feasible and prudent alternatives to the proposed activity have been analyzed by the applicant and the proposed activity is likely to cause less or no environmental impact to wetlands or watercourses than those alternatives.
- [4.] The short-term and long-term impacts of the proposed regulated activity on wetlands or watercourses are not to be so significant as to warrant denial of this application.
- [5.] The long term productivity of the wetlands or watercourses will not be damaged by the approval of this application;

[6.] The proposed regulated activity will not cause irreversible and irretrievable loss of wetland or watercourse resources.

[7.] The proposed regulated activity neither threatens nor impacts the safety, health or reasonable use of property; and

[8.] The proposed regulated activity and future activities associated with or reasonably related to, the proposed regulated activities which are made inevitable by the proposed regulated activity will not have significant impacts on wetlands or watercourses outside the area for which the activity is proposed.

In addition, the Agency considered measures, which would mitigate the impact of the proposed activity and may be imposed as conditions of the permit. Such measures include the availability of further technical improvements or safeguards which could feasibly be added to the plan or action to avoid the reduction of or damage to the wetland's or watercourses natural capacity to support desirable biological life, prevent flooding, supply water, control sedimentation and/or prevent erosion, assimilate wastes, facilitate drainage, and provide recreation and open space. The Agency renders its decision to issue this permit on the following considerations and criteria:

- A. That the natural functions and quality of water in local drainage systems both on and off-site shall be preserved and maintained.
- B. That the overall impact of this development on the environment will be kept to a minimum if the conditions imposed by this permit are carried out by the applicant.
- C. There are no reasonable and prudent alternatives which will allow the same activity to be carried out on the proposed site.
- D. During the period when this permit remains in force, the applicant and the Inland Wetland and Watercourses Agency will be working together in good faith to resolve any matters that may arise relative to the environmental impact on the community due to the activities of the applicant.
